## Introduction

The purpose of this document is to define field-to-field mapping for E Team reports in order to create Data Export Views to facilitate interface with Crystal Reports.

This document provides the report and field mapping detail required to create the views that are necessary to allow the end user to create reports using Crystal Reports from SQLServer Table Name.

The following terms are used throughout this document:

- **Table Name:** This identifies the relational database Table Name in which the data resides.
- **Field Label:** Label that the end user will see when accessing this view via Crystal Reports. This label should match very closely with the one on the actual report. Abbreviations are used in some cases.
- **Field Name/Formula:** This identifies the field or formula to be associated with each “Field Label”.
- **Data Type:** Data type of the field identified by the Field Name/Formula.
- **Unique\_Key:** Including this field provides the end user with the unique identifier for each report.
- **Parent\_Report\_Unique\_Key:** This field provides the end user with the “Primary Key” of the Parent Document. This is used for setting up relations between reports throughout the system. E.g. setting up relation between any report and their sub reports if any.
- **Join Condition:** ‘=’ signifies INNER JOIN condition.  
Unless explicitly mentioned all OUTER joins will be LEFT OUTER JOINS.
- **History\_Version:** This identifies the document as Active or Historical. “No” indicates a current or active document, “Yes” indicates an historical version of the document in question.
- **Foreign\_Doc:** This identifies whether the document originated in the current end user’s system or the system of a Data Sharing partner. “No” indicates that the document originated in the current end user’s system, “Yes” indicates that the document originated with a Data Sharing partner.
- **Owned\_By:** This identifies the document owner, either the current end user organization or in some cases a Data Sharing partner if control of the document was assigned to that partner.

## Field-to-Field Mapping by Report

### Personal Profile

---

#### Personal Profile View - V\_PROFILE\_VIEW

**Table Name:** TBL\_PERSONAL\_PROFILE **P**

| Field Label                             | Field Name/Formula | Join Criteria | Data Type      |
|---|--------------------|---------------|----------------|
| Unique_Key                              | P.PROFILE_ID       |               | NVARCHAR (100) |
| First_Name                              | P.FIRST_NAME       |               | NVARCHAR (300) |
| Last_Name                               | P.LAST_NAME        |               | NVARCHAR (300) |
| Org_Location<br>(Organization/Location) | P.ORG_LOCATION     |               | NVARCHAR (300) |
| Regional_Office<br>(Region/Office)      | P.REGIONAL_OFFICE  |               | NVARCHAR (300) |
| Position                                | P. POSITION        |               | NVARCHAR (300) |
| Agency                                  | P. AGENCY          |               | NVARCHAR (300) |

#### Personal Profile View - V\_PERSONAL\_PROFILE

**Table Name:** TBL\_PERSONAL\_PROFILE **PP**  
 TBL\_REPORT **REPT**  
 TBL\_USER **U**  
 TBL\_ACTIVE\_USER **AU**

**Join Criteria:** REPT.GLOBAL\_REPORT\_ID = PP.PROFILE\_ID as J1  
 U.PROFILE\_ID OUTER JOIN REPT.REPORT\_ID as J2  
 U.USER\_ID OUTER JOIN AU.USER\_ID as J3

| Field Label    | Field Name/Formula   | Join Criteria | Data Type      |
|----------------|--|---------------|----------------|
| Unique_Key     | P.PROFILE_ID   | J1            | NVARCHAR (100) |
| Report_Version | CASE REPT.STATUS<br>WHEN 'O' THEN 'History'<br>WHEN 'C' THEN 'Closed'<br>WHEN 'D' THEN 'Deleted'<br>WHEN 'A' THEN 'Active'<br>WHEN 'R' THEN 'Restored'<br>ELSE 'Not Known' END | J1            | VARCHAR (9)    |
| Owned_By       | FId:= REPT.IS_OWNER<br>@If(fld="Y","Local","No")   | J1            | NVARCHAR (5)   |

E TEAM ADMIN GUIDE – APPENDIX C: FIELD-TO-FIELD MAPPING

| Field Label       | Field Name/Formula                     | Join Criteria | Data Type      |
|-------------------|--|---------------|----------------|
| USER_NAME         | U.USER_NAME                            | J2            | NVARCHAR (100) |
| LOGIN_TIME        | GET_LOGIN_TIME(U.USER_ID, REPT.STATUS) |               | DATETIME       |
