

Monthly Auto Restart

 supportcenter.nc4.com/hc/en-us/articles/217519538-Monthly-Auto-Restart

As part of the installation process, two files will be installed in the C:\Windows directory that serve to automatically restart E Team service on a monthly basis. These two files are a separate download and are available on the support site at <http://support.NC4.us>. The two files include the **RestartEteamService.bat** file and the **sleep.exe** file. On the specified date and time each month,

E Team service will be automatically stopped, pause for thirty seconds and then restart.

Ensure that the E Team service name in the batch file matches with the name in the Windows Service Manager.
