

GIS Routing Configuration

 supportcenter.nc4.com/hc/en-us/articles/115001576647-GIS-Routing-Configuration

With exception of routing, GIS configuration is performed in your [browser](#). In order to utilize the directions widget you must have a routing service, in addition a traffic service is also supported but not required. Routing configuration is performed on your E Team server. Please contact support@nc4.com to request assistance.
